## CERTIFICATES

---

<b>Certification of Field Technician</b> Computing (TL/S/L4/C043N)	<b>MS-CIT</b> MKCL Certified, 2016	<b>Tally – Accounting Software</b> Certified in Tally ERP, 2017
---	---------------------------------------	--

## PROJECTS

---

### Blogging website

I built a blogging website called *Sunday Jalebi*, where short and engaging blog posts are shared daily in a scrollable, easy-to-read format—similar to Instagram Reels, but for text. I used React.js for the frontend and PocketBase as the backend to manage blog content and user data.

### Car showroom

I created a Car Showroom website as a frontend project using HTML, CSS, JavaScript, and Bootstrap. The website features a responsive design that showcases different car models, specifications, and images in an organized layout.
